Markets correlation

Understanding the correlation between commodities, bonds, and other markets is an essential part of an effective portfolio management.

By allocating investments strategically, we can take advantage of the diversification benefits offered by these assets.

Gold, as a precious metal and safe haven, can play a pivotal role in your investment strategy, providing a hedge against economic uncertainty and market fluctuations.

Profit Sharing

The initial 6% of profits go to the Limited Partners.

The subsequent 2% of profits belong to the General Partners.

Beyond 8%, profits are shared between LP's and GP's in a 75% 25% split.
